

PRAYASH BIKRAM SHAH

Email: prayash.shah@gmail.com

Summary

Data Platform and Product Specialist with experience delivering scalable data solutions across healthcare and fintech environments. Strong background in enterprise data onboarding, ETL architecture, data governance, SQL analysis, and Hadoop-based ecosystems. Experienced in partnering with product owners, architects, engineering teams, and stakeholders to deliver reliable data platforms aligned with operational and analytics requirements. Skilled in Agile and SAFe delivery environments with a focus on scalable integrations, data quality, process optimization, and cross-functional execution.

Work Experience

Cotiviti, Inc.

Remote (Charlotte, NC)

Manager, Data Solution

May 2026 – Current

- Support enterprise data onboarding initiatives supporting healthcare analytics platforms.
- Review onboarding approaches and implementation plans to ensure alignment with platform and client requirements.
- Coordinate production readiness and client go-live activities for onboarding initiatives.
- Partner with Product Owners, Architects, Data Engineers, and client stakeholders to support successful onboarding outcomes.
- Support onboarding, testing, validation, and deployment activities across cross-functional teams.
- Contribute to automation of dataset profiling and validation workflows supporting onboarding and data quality processes.

Cotiviti, Inc.

Remote (Charlotte, NC)

Senior Data Solution Specialist

Apr 2025 – May 2026

- Led enterprise-scale data onboarding, mapping, and standardization initiatives across multiple healthcare data domains.
- Designed and maintained standardized data layout structures and transformation frameworks aligned with operational and platform requirements.
- Performed SQL-driven data profiling, validation, and transformation analysis to ensure onboarding accuracy and downstream platform readiness.
- Partnered with Data Engineers and Engineering Managers to implement scalable ETL workflows, transformation pipelines, and onboarding solutions.
- Conducted technical walkthroughs, reviewed implementation designs, and supported QA strategy development for onboarding enhancements.
- Troubleshoot production integration and transformation issues while coordinating resolutions across development and operational support teams.
- Partnered with Product Owners, Architects, and Engineering teams to refine onboarding requirements and acceptance criteria within Agile and SAFe delivery environments.

Cotiviti, Inc.

Remote (Charlotte, NC)

Senior Technical Specialist

Feb 2023 – Mar 2025

- Performed enterprise healthcare data onboarding, mapping, and standardization activities across multiple client data formats.
- Designed and refined ETL workflows, source-to-target mappings, and integration pipelines supporting scalable healthcare data onboarding.
- Maintained standardized data layouts, transformation rules, and validation processes aligned with

platform and client requirements.

- Conducted SQL-based analysis and validation to support accurate implementation of transformation logic.
- Participated in end-to-end project delivery including technical analysis, implementation, testing, deployment, and production support activities.
- Collaborated with Data Engineers, Product Owners, and Architects to support onboarding and integration initiatives within Agile and SAFe delivery environments.
- Supported onboarding optimization initiatives through workflow refinement, technical documentation, and integration standardization.
- Resolved technical and operational blockers impacting onboarding and transformation activities.

Cedar Gate Technologies

Project Manager – Data Department

Kathmandu, Nepal

Nov 2021 – Sept 2022

- Managed delivery planning and coordination for data-focused platform initiatives within Agile environments.
- Gathered and analyzed technical and operational requirements supporting onboarding and platform enhancement initiatives.
- Coordinated cross-functional teams across engineering, product, and business functions to support successful project execution.
- Identified project risks, mitigated delivery blockers, and ensured completion of initiatives within scope and quality expectations.
- Facilitated Agile ceremonies including daily scrums, sprint planning, stakeholder reviews, and backlog discussions.
- Supported Proof of Concept initiatives and feature validation activities for platform enhancements.
- Managed stakeholder communication, delivery tracking, and project reporting across distributed teams.
- Enforced operational governance and access control practices aligned with organizational policies.

Lenden Sewa Pvt. Ltd.

Product Manager - Fintech

Kathmandu, Nepal

Oct 2019 – Oct 2021

- Collaborated with engineering, business, and customer-facing teams to deliver fintech platform enhancements.
- Gathered and translated business and market requirements into prioritized product features and technical stories.
- Worked closely with senior engineers on platform architecture discussions and feature implementation decisions.
- Conducted feature benchmarking and Proof of Concept evaluations for new platform capabilities.
- Led sprint planning, backlog prioritization, and Agile delivery coordination across cross-functional teams.
- Supported MVP development and rollout activities for mobile and web platform initiatives.
- Coordinated with DevOps and engineering teams to support CI/CD implementation and release activities.
- Participated in deployment coordination and post-release operational support for iOS and Android platforms.
- Contributed to UI/UX discussions and workflow improvements supporting customer experience initiatives.

Lenden Sewa Pvt. Ltd.

Software Engineer (QA/QC – Part Time)

Kathmandu, Nepal

Sept 2019 – May 2020

- Performed API and mobile application testing including validation, bug identification, load testing, and QA documentation activities.
- Supported reporting, dashboard, and small-scale web development initiatives related to operational data workflows.

Lenden Sewa Pvt. Ltd.

QA Trainee

Kathmandu, Nepal
July 2019 – Aug 2019

- Supported mobile application test automation and QA validation activities.

Bluebell Software Solution Pvt. Ltd.

PHP Developer Internship

Kathmandu, Nepal
Sept 2018 – Dec 2018

- Developed backend dashboard components, authentication modules, and search functionality for internal web applications.

Skills

Data & Platform Technologies:

ETL Architecture, Data Integration, Data Governance, Data Mapping, Data Profiling, SQL Analysis, Hadoop Ecosystem, Hive, Data Validation, Data Pipelines, Source-to-Target Mapping

Product & Delivery:

Product Ownership, Agile Delivery, SAFe Practices, Sprint Planning, Requirements Gathering, Backlog Prioritization, Cross-Functional Collaboration

Technical & Operational:

API Testing, Quality Assurance, Production Support, Technical Documentation, System Integration, Platform Operations

Tools & Technologies:

Hive, Hue, Databricks, SSMS, AWS S3, Jira, GitLab, Redmine, Grafana, Postman, JMeter, Git, Linux, Ubuntu, MySQL Workbench, PyCharm, Figma, InVision

Education

Islington College

BSc (Hons) Computing

Awarded by London Metropolitan University, London, UK.

Kathmandu, Nepal
Sept 2016 – 2019 Dec

Certifications

SAFe® 6 Product Owner/Product Manager

Credential ID 43253334-5914
